

## **Mapping medieval ceramics – use of ArcGIS Online in the study of movable archaeological heritage**

Ladislav Čapek; Pavel Hájek; Karel Slavíček; Dalibor Všíanský; J. Petřík

The paper informs about the created maps and web applications in ArcGIS Online for studying medieval ceramics – the map of petrographic analysis and ceramic assemblages. Both maps are used to archive and support scientific research of ceramics in archaeology and natural science (ceramic petrography).

The maps were developed within the project NAKI II DG18P02OVV020 funded by the Ministry of Culture of the Czech Republic (principal investigator Ladislav Čapek)
